Skills

Languages	Javascript, Typescript, Python, PHP
Technologies	React, Node Js, NextJs, Redux, Socket.io, FastAPI, Express, Vite, Jest, React Testing Library, Vitest
Databases	MongoDB, MySQL, PostgreSQL, DynamoDB, Elasticsearch, Redis
Cloud	AWS (EC2, Lambda, S3, SNS, CloudWatch)
Queues	Apache Kafka, Faktory Work Queue, AWS SQS
Tools	Git, Docker, Kubernetes, Jenkins, Swagger, Bitbucket

Experience

Testsigma

April 2025 – Current

Senior Software Engineer

- Developed and integrated a **Jira Marketplace app** to automate workflows and improve cross-team collaboration, leading to a **15% increase in test cases** created directly from Jira.
- Implemented **asynchronous Jira integration using Faktory Work Queue**, improving background job reliability, reducing ticket **sync time by 50%**, and ensuring scalable.

Comviva (Tech mahindra)

Jul 2023 – April 2025

Tech Lead

- Built a **custom authentication integration library** that allowed clients to plug in their own providers (e.g., **Keycloak, MSAL**) without modifying the core application, enabling seamless onboarding of **5+ new authentication providers** and integration across **10+ client environments** within three months.
- Implemented **event-driven AWS Lambda** functions triggered by **S3 uploads**, streamlining data processing operations and improving throughput by **45%**.
- Implemented internal microservice communication using **Apache Kafka** for async event-driven workflows and **REST APIs** for synchronous calls, increasing system reliability and fault tolerance by **30%**.

Acute Informatics Pvt. Ltd

Jan 2023 – Jun 2023

Software Developer

- Developed **responsive and user-friendly interfaces** for the Loan Origination System (LOS) using **React, Redux Toolkit, and TypeScript**, improving user navigation, streamlining workflow, and reducing overall processing time by **25%**.
- Led scalable backend services for the **Banking Audit System and LOS** using **Node.js and MongoDB**, processing **10,000+ financial transactions monthly** and optimizing workflows to reduce processing time by **30%**.

Tatvasoft

Jul 2021 – Jan 2023

Software Engineer

- Delivered a scalable healthcare EHRM solution adopted by 10+ clinics and hospitals, streamlining operations, **increasing patient engagement by 20%**, and **improving data management efficiency by 30%**.
- Built **video call functionality using Twilio** to enable remote consultations between patients and doctors, **reducing in-person appointments by 30%** and enhancing accessibility for remote patients.

Education

Gujarat Technological University, Ahmedabad

Jul 2017 – Jul 2021

Bachelor of Engineering, Information Technology

CGPA 8.81/10.00

Sahjanand School of Achiever, Gandhinagar

Jul 2015 – Mar 2017

XII (Higher Secondary), Science

90.33 % (97 Percentile)

Personal Projects

Crossify- Connect with your interest

Nov 2020 – Feb 2021

ReactJS, Express, MongoDB, TailwindCSS, NodeJS

- Developed **discovery of nearby events and clubs** by integrating **Google Maps API**, supplemented by **MongoDB's geospatial search** for precise location-based results.
- Integrated **OAuth authentication** for secure sign-up processes, registration via **Facebook and Google platforms**
- Programmed time-based **event reminders and personalized promotional email campaigns**, utilizing **EJS templates and Mailchimp's SMTP servers** for optimal impact
